eYRC 2021-22: Agri Bot (AB)

Expected Output

- The following videos can be considered as a valid output. **The `record:=true` part can be excluded from your submission video**. This part is included in the below gif just to show you how rosbag recording works. The below gif take few seconds to load, please wait `(-_-')`

‹   ›

- To know whether the nodes are talking to each other as expected one can use the command `rqt_graph`, while their script is running. Below, you can find an expected graph for this task.
